The rules were simple: "The objects on the map must be in the direct line of sight of the Earth," explained Jean-Luc Monier, a French astronomer and representative of the IAU. The winners of the contest were announced on Monday and, amongst the 26 finalists, you can see the map of the entire world in which the Milky Way is projected on the top of the globe. To see the IAU's video showing all the results and explanations of the winners, click here. It took 24 people from 20 countries 6 months to create the map, a task that required them to use their smartphones to capture images of the night sky. This time, the aim was to help people to understand and appreciate the universe, but even more importantly, the image-makers also wanted to highlight what they called "light pollution," the amount of light that we allow to pollute the skies of our planet. "I think the most significant goal of this competition is to allow people to see the universe in a very different way," told the Associated Press by email. The photographer from New Zealand, who preferred not to give his name, told Wired that the final map was his best work yet. "It's my most emotional map to date, not because

MiFi Status is a simple-to-use piece of software developed in the Java programming language, which enables you to check the Mi-Fi status information of your Virgin Mobile Mifi connection. It runs in the taskbar notifications area and doesn't integrate rich options or customization settings, making it accessible to all types of users. Setup, prerequisites, and interface The installation operation is a speedy task that shouldn't give you any trouble, thanks to the fact that there are no special options or third-party offers bundled with the setup kit. Just keep in mind that you must have the Java runtime installed, since it was designed with the aid of this platform. Once launched, it creates an icon in the system tray to facilitate quick access to its settings while enabling you to carry on with your normal desktop activity without any interruptions. View the Mi-Fi connection status Details show the connection name, duration and signal, along with the IP address. There are no options implemented for copying information to the Clipboard, printing it, or exporting it to file. Apart from the fact that you can hide the status window as well as exit, there are no other noteworthy settings provided by this tool. Evaluation and conclusion It worked smoothly in our tests, since it didn't hang, crash or indicate errors. The utility remained stable throughout its runtime. Although it hasn't been updated for a long time, we haven't experienced compatibility issues on newer Windows versions. CPU and RAM usage was minimal, so it didn't hamper the overall performance of the computer.
